

Magnetism Anion Craving Pendants

The main function of magnetic anion:

- (1) Producing reactive oxygen: anion can activate the oxygen macromolecule in the air effectively and can make it active so as to be absorbed by human being avoid of the air conditional disease.
- (2) Improving the lung functions: once human absorb the anion with oxygen, lung will absorb more 20% oxygen and relieve more 15% CO₂ than usually.
- (3) Promoting metabolism: inspire multiple enzymes in the body so as to accelerate the metabolism.
- (4) Enhancing the anti-disease ability: change the reactive ability of body and activate the capacity of the network endodermis system, amplifying body's immunity.
- (5) Improving the sleeping quality: people will get elation under the function of oxygen anion, which has an available function of relieving pain, and they will improve their working efficiency and sleeping quality.
- (6) Dispatching the bacterium: anion generator will produce little ozone while producing amount of anion, the combination will absorb easily various disease and bacterium, making the change of its productive construct and removal of energy, leading to its death. Removal dust and kill bacterium, reliving passive smoking then the environmental health is everywhere.
- (7) Cleansing the air and removing: anion with negative charge poles with the smoke dust with passive charge floating in the air, making it sediment naturally.
- (8) Protecting: neutralize the high pressure and static of television and computer, relieving the damage made by dust to the television and computer.
- (9) Anion can enhances the moisture ability of hair, as normally the hair appears to be depressing fish scale state, but the anion can make hair look gloss form the depressing fish scale state, then also can neutralize the static of hair avoid hair fork.

ChenYang magnetic anion craving pendants will bless you luck together, bringing you confidence, active and healthy.
